Introduction

PayPDM Coin [PYD] is a high privacy prioritized crypto reserve with core implementations of blockchain as financial system with transverse crypto adopters towards a decentralized, non-taxable and viable medium. PayPDM oversees a blockchain platform for private crypto lending and majorly crypto finance l in optimization of funding of blockchain based projects in the open and generation of revenues for her and its community.

PayPDM Coin is a digital currency issued by blockchain-based financial investing services under the auspices of PayPDM . PayPDM has brought about trust, transparency, automation and efficiency towards crypto-likeness for individuals and firms. PayPDM Network is made up a big team of digital experienced individuals, affiliates, developers, financial experts and others. PayPDM Coin is part of PayPDM Network which is a decentralized system on crypto investing.

Existing Problem

- Financial firm earning and egocentrism.

Financial firms are known to have a good worth and at max, a huge worth. Without paying attention to whats in for the community. This firms excels with the help of right strategy and right functioning of community which brings a positive and public value. Apart from free offers or discount offer, they aren't compensated or earning under such firms.

- Negative impression about cryptocurrency

Most firms don't want to partner with crypto-related firms at their growing phase but always want partnership and collaboration with such crypto firms when it reaches its peak. They always want to be in their success stories , happy blog or magazine posts without being in their struggling stories.

- Quid pro quo

Most crypto firms do not have enough funds when starting and would have to break a bank to reach various investors who will always find one fault and good reason for it not to work or come through. While other firms that might help, of course it isn't a free favor there is a quid pro quo involved.

While this striving crypto firms keep growing and gaining relevance, Many offers then come in from everywhere. Once this offer aren't accepted, then the issuer or investor behind it experiences schadenfreude towards the striving crypto firm/ project.

- Non reliability

With the exposure to advanced development, everything could be compromised just to suit an egoistic individual. Most people develop this unlikeness for any FinTech product which has to do with investing, saving or revenue generation using cryptocurrency.

Various people have been affected due to their past experience with random schemes and get rich quick systems. People hold a perception of cryptocurrency being synonymous to fraud and nothing else.

Others problem includes

- Centralized financial tradings
- Non experienced in multiple crypto portfolio
- Blockchain-based startups funding difficulties
- Cryptolending
- Non transparency
- Firm based profitablilities.
- Uncertain.

Our Solutions

- ➢ PayPDM implemented a decentralized financial tradings which is one of the finest & outstanding financial trading ever. PayPDM FinTrade is a decentralized blockchain-based financial trading services .

- ➢ One of our tag lines are ''Hodl, manage and diversify crypto assets''. As this implies, PayPDM has a well experienced and diverse team who makes the long run for a viable crypto portfolio with non subjected to volatility through major risk controls.

- ➢ Blockchain-based startups find it difficult to raise funds at most times due to the high non expectancy rate. PayPDM Networks finds suitable startup which has a growth potential and finances through which generates revenues to both PayPDM & its community.

- ➢ With goals and plans, Cryptolending under PayPDM Network is undergoing development to being made available to the community

  The first beta users are only available to PayPDM FinTrade users who has passed requirements.

- ➢ PayPDM isnt bent on making revenues alone. PayPDM is a community based services which, (as we earn, the community earns). PayPDM revenues are majorly for PYD holders, PYD traders and FinTrade users.

- ➢ PayPDM has been operational since 2017. Crossing the $2.5M tradings point at 18 months of operation. PayPDM Networks hosts various of projects which includes FinTrade, CryptoLend and PDM Gamings Networks.

Components

- Reliability, Protection and Insurance

All cryptocurrencies within PayPDM are stored in cold storage which is also protected from malicious and compromise. Users Funds are insured and protected as well as User data/information.

- User Flexibilities

PayPDM gives its community the choice to make use of any of its operational service easily and possibly concurrently. Being part of a great firm where users opinion are prioritized would be the only and the right point.

- Community Earning bonus

Every member within the PayPDM Community earns a good revenue with scale of preference from Priority token holders to unit holders, PayPDM distributes part of its profits in an operational quarter towards the community members.
Other bonus which includes affiliates network, referral bonus, purchase bonus.

World leading decentralized crypto finance firm.

Financial services includes:

- Investing

PayPDM FinTrade was developed to help its community and public safely invest their cryptos and get more revenues on it with a low risk involved.

FinTrade is a decentralized financial service which no one holds central power not evens the firm. With experienced and long term financial traders, experts behind the Finance team. FinTrade is functioning in response from foreign exchange, cryptocurrency in general and crypto asset diversification.

FinTrade is an easy to use financial service and it is being regulated with coming developments to cover 54 countries with high law compiiance. From insurance of investors funds, protection of funds incase of unlikely tradings and investor security. We would remain a leading crypto finance firm offering safe and easy investing.

- Gamings

Gaming has been our dreams and part of our goals. We are behind an open gaming system which is multi user supported that brings in revenues to users. Users can earn real coins which can be exchanged for cryptos.

- Crypto Lending

An easy crypto lending platform where one can lend cryptos without collateral using a quick verification and simple ID. This would be open only to PayPDM Community members until then, Developments are being implemented to having a successful release.

- Real Estate & Fundings

Real estate is the forever key which would remain in appreciation because the land is a part of nature. It can not be volatile, neither can it drop in value. It is extended as a lifelong agreement and subjected to value increase in due times.

PayPDM Coin Utility

PayPDM Coin (PYD) Represents Proof-of-Usage (PoU) and Proof-of-Stake (PoS) of the PayPDM Network. PYD can be used for:

PayPDM FinTrade

Crypto Lending

Service fees

Real estate Staking

PDM Gaming withdrawals

Trading on Liisted Exchanges.

Proof-of-Usage

The allocation of PYD is measured by the amount of contribution each user makes to the PayPDM network. PYD rewards are available for effective activities at PayPDM and for contributing to the PayPDM network. 30% of the total supply of PYD will be used to reward users who contribute to the PayPDM network. Effective activities include: inviting friends to join the PayPDM network, participating in PayPDM's FinTrade, participating in PayPDM's campaign and promotions, Priority Token holders and PayPDM Community members

Proof-of-Staking

PayPDM Network have the right to earn PYD Coins. PayPDM allocates 50% of the total supply of PYD participants holders of PYD. PayPDM distributes 50% of its total supply among PYD holders in proportion to the number of PYDs owned by them. PayPDM also distributes 30% of total profit in operational quarter to holders of PYD in proportion to priority holders to unit holders.
